

STEDI

SPORT PLUS 
SILVER EDITION

Information Guide

SILVER. BULLET.

PROVEN OFF THE BEATEN TRACK, REIMAGINED FOR THE OPEN ROAD.

Introducing the STEDI™ Type-X Sport Plus Silver Edition. One of STEDI's most popular high-performance driving lights, now presented in a stunning liquid-silver DuPont™ powder coat finish. Proven off the beaten track, reimagined for the open road – the Sport Plus Silver Edition is designed specifically for truck and heavy vehicle industries, incorporating state-of-the-art technology and modern aesthetics to create a refined LED driving light that yet again sets a new standard.

An evolution of the Type-X Sport Plus, the Silver Edition has been meticulously designed to blend fluidly into the reflective chrome bar-work of Australia's most prestigious trucks and haulers.

The DuPont™ powder coat finish has been uniquely customised to capture and reflect light, effortlessly integrating with your truck's front-end design while providing all the protection benefits of powder coat finishing – guaranteeing optimal performance and extending the lifespan of your light.

Engineered with a precision cast aluminium body and a hardened polycarbonate lens, the Sport Plus Silver Edition achieves a robust IP68 rating against dust and water, while the optimised 5000K colour temperature reduces eye fatigue over sustained periods of use – something particularly important for long haul truck drivers navigating dynamic driving conditions. Available in both 7 and 8.5 inch units.

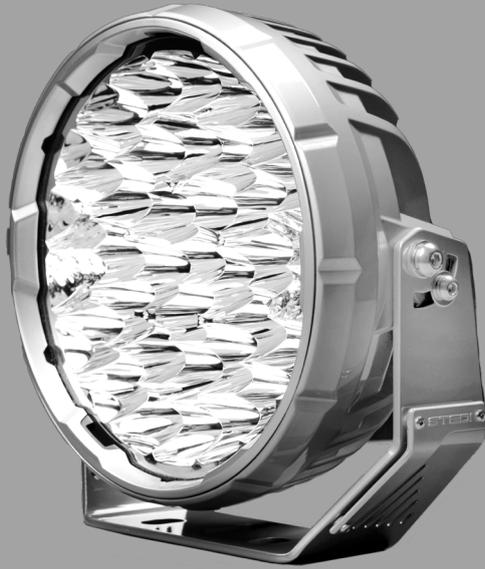

PLUS DISTANCE. PLUS FLOOD.

Type-X Sport Plus Silver Edition delivers next-gen performance in beam distance and flood output. Both the 7 and 8.5 inch size variants will throw light well over 1km down the road while providing more flood through the critical zones of the road.

The combination of OSRAM P8 & CREE XP20s LEDs with the four integrated wide-beam reflectors ensure excellent near-field illumination, blending seamlessly to eliminate hot spots and provide a smooth driving beam.

TYPE-X™ SPORT PLUS SILVER EDITION 8.5 INCH

Product Size

8.5 Inch

1 Lux Distance

1192 Metres (Pair)

Effective Lumens

24,803lm (Pair)
